

## Trinity St. Mark's U.C.C. Home Light bulb Program

**What?** Trinity St. Mark's U.C.C. can purchase high quality light bulbs at wholesale prices. The light bulbs are fluorescent, but come in warm colors rather than stark white like most fluorescents. The bulbs we can get are higher quality than found in retail stores, but for a lower price. The bulbs have a longer life, and are quick startup. Some retail fluorescents take several minutes to reach full brightness, but these bulbs are take a minute to warm up. Fluorescents can be found in any wattage to match the brightness of existing incandescent bulbs. Satisfaction guaranteed.

**Why?** A wholesale fluorescent light bulb may cost \$3 versus \$0.50 for an incandescent bulb. However, the fluorescent bulbs last 4 to 5 times as long and they save much money in electricity. Fluorescents use about a quarter of the electricity as an incandescent bulb. The reason that our church is involved in this is that by putting in energy efficient light bulbs we are being good stewards of our planet. We are helping save it for our children and grandchildren. You can read more at: <http://www.mipl.org/>

**How?** Check off how many bulbs you need below. If the bulb is in a fixture, such as a ceiling fan globe then you should measure the bulb to pick the right size. You may want to get one extra as a spare. Fluorescent bulbs generally can't be put on a dimmer. Be sure to ask for that if you need it. The total price includes delivery. Bulbs will be delivered within one month after the order is complete. You may choose to pay before or after. Cash or checks made out to: XXXXXXXXXXXX.

**Note:** 1) Fluorescent bulbs are disposed of on Household Hazardous Waste Days, not put in the trash. 2) Prices listed below include shipping and sales tax. 3) Need other bulbs? Alan may be able to find them. (313-xxx-xxxx

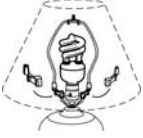

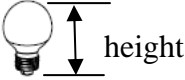

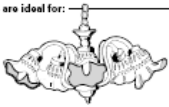

**Help?** Anyone needing help putting in the light bulbs, or assembling a fixture can check the box below for help.
