December 2023, Volume 8, Issue 12

REFLECTION:

Jesus came into the world so that we might have life more abundantly. Does that mean 27 different kinds of cookies, decorations in every corner of the house, mountains of gifts, and parties every weekend? What are you expecting of yourself and others? What are others

expecting of you? How realistic are these expectations? How can you adjust them with attention to self-care?

Holiday To-Do List

- Listen to your heart
- Worship God
- Exercise
- Pray
- Rest
- Give thanks
- Love one another
- Be gentle with yourself!

Dear God, help me to listen to my heart during this busy season. Help me to set aside the expectations of others and then move through this season in a way that most appropriately fits me and honors the birth of Jesus. Amen.

A TIMELY HEALTH TIP:

During this holiday season, people may wish to attend church activities and socialize more like they did during the 2019 holiday season. **As of November 20th**, every home in the U.S. is eligible to order an additional [four free at-home COVID-19 tests](#). If residents have not already ordered tests this fall, they may place two orders for eight tests. The order of COVID tests is entirely free, and the shipping is also free.

WELLNESS MINISTRIES FOCUS:

World Aids Days

December 1st marks the 35th commemoration of [World Aids Day](#). It is a reminder of the global efforts to end the transmission of the virus, honor those we have lost, and continue working year round towards a day when H.I.V. is no longer a public health threat.

[HIV](#)(human immunodeficiency virus) is a virus that attacks the body's immune system and interferes with the body's ability to fight infection and disease. When HIV is not treated, it can lead to [AIDS](#) (acquired immunodeficiency syndrome).

There is currently no effective cure. Once people get HIV, they have it for life. However, with proper medical care, HIV can be controlled. People with HIV who get [effective HIV treatment](#) can live long, healthy lives and protect their partners. As of the end of 2021, an estimated 1.2 million people in the U.S., age 13 and older, had been diagnosed with HIV. More than 36,000 people continue to be diagnosed every year. The South is home to more than half (52%) of the number of people HIV infected. The West follows them with 21%. Midwest and Northeast each contain 14%.

[Ending the HIV Epidemic in the U.S. \(EHE\)](#) is a bold, whole-of-society initiative coordinated by the U.S. Department of Health and Human Services (HHS). EHE's goals include (1) Reducing new HIV infections in the United States by 75% by 2025 and by 90% by 2030 and (2) Advancing [health equity](#) by scaling up key HIV prevention and treatment strategies.

Wellness Ministries can assist in these efforts through the year. Stigma and discrimination remain formidable barriers to HIV testing, prevention, and care. Programs provided by Wellness Ministries can implement small changes that help end HIV stigma and work to stop the spread of HIV together. The [Let's Stop HIV Together stigma language guide](#) provides talking points, a fact sheet, stigma scenarios and ways to take action, and pledge cards to help stop HIV stigma.
